

To all our customers

01/19/2023

REACH/RoHS/NAIS Compliance

Dear Ladies and Gentleman,

as a manufacturer of packaging and technical molded parts of all kinds made of EPP, we are a downstream user (manufacturer of products) according to the REACH regulation. According to information from our suppliers, the materials we use does not contain any substances of concern (SVHC) of Annex XIV of the REACH Regulation (Regulation (EC) No. 1907/2006) in accordance with Article 57 as of January 17, 2023 above 0.1% . Should a new candidate substance be contained in the products that we deliver to you in the future, we will comply with our legal information obligation according to Art. 57 REACH without being asked.

Additional we confirm that,

Lead (Pb), 0.1%
Mercury (Hg), 0.1%
Cadmium (Cd), 0.01%
Hexavalent Chromium (Cr+6), 0.1%
Polybrominated Biphenyls (PBB), 0.1%
Polybrominated Diphenyl Ethers (PBDE), 0.1%
Di(2-ethylhexyl)phthalate (DEHP), 0.1%
Benzyl butyl phthalate (BBP), 0.1%
Dibutyl Phthalate (DBP), 0.1%
Diisobutyl phthalate (DIBP), 0.1%

according to Annex II of Directive 2015/863/EU (RoHS 3), or according to Article 6 of Directive 2011/65/EU (RoHS 2) and Regulation (EC) No. 850/2004 of the European Parliament and Council of 29 April 2004 on persistent organic pollutants and amending Directive 79/117/EEC (OJ EU L 158 of April 30, 2004, p. 7), last amended by Regulation (EU) 2019/636 of April 23, 2019 amending the Annexes IV and V of the regulation (OJ L 109 of 24 April 2019, p. 6) DDT, lindane, polychlorinated dibenzodioxins and -furans (dioxins and furans) and polychlorinated biphenyls are not contained in the raw materials that we use. Because we don't add any additives to the raw material during production and none of the substances mentioned are released in the production process, we can confirm that the products we deliver to you comply with the substance bans in accordance with the above-mentioned guidelines and limit values are not exceeded.

Statement to NIAS:

Based on the previously performed analysis of this article, we have not identified any inadvertently introduced substances (NIAS - Non Intentionally Added Substances) which have given rise to a relevant risk in the risk assessment according to internationally recognized scientific principles.

With best regards

C. Schedel
